

Kenneth Obinna Opara

Backend Developer · Node.js · Express · MongoDB · Redis · JWT

Lagos, Nigeria | +234 916 381 8227 | kennethopara.ko@gmail.com | github.com/kenneth-opara | linkedin.com/in/kenneth-opara

PROFESSIONAL SUMMARY

Aspiring Backend Developer with hands-on experience building RESTful APIs and scalable server-side systems using Node.js, Express.js, MongoDB, and Redis. Skilled in authentication architecture (JWT/bcrypt), caching strategies, and database design. Background in operations and customer support leadership shapes a practical approach to reliability, clear error handling, and systems that are easy to reason about. Open to junior backend roles, internships, and remote opportunities.

TECHNICAL SKILLS

Languages & Runtime: JavaScript (ES6+), Node.js

Frameworks: Express.js

Databases: MongoDB (Mongoose ODM), PostgreSQL (basics), Redis

Auth & Security: JWT Authentication, Bcrypt, API Security, Middleware

APIs & Architecture: REST APIs, CRUD Operations, MVC Architecture, Cache-aside pattern

Tooling: Git & GitHub, Postman, Render / Railway Deployment, dotenv, npm

Methodologies: Agile / Scrum

BACKEND PROJECTS

URL Shortener API — Node.js · Express · MongoDB · Redis | github.com/kenneth-opara

- Built a REST API that accepts a long URL and returns a unique short code with click-tracking stored in MongoDB.
- Implemented Redis SET/GET caching for redirect lookups, eliminating repeat database queries on high-traffic URLs.
- Gained hands-on experience with Express routing, middleware design, and Redis TTL-based cache patterns.

User Authentication API — Node.js · Express · JWT · MongoDB · Bcrypt | github.com/kenneth-opara

- Engineered a full authentication flow — registration, login, protected routes, access tokens, and refresh tokens.
- Hashed passwords with bcrypt before storage; short-lived JWTs issued on login, refresh tokens persisted in MongoDB.
- Implemented a protected-route middleware pattern reusable across any Express application.

Notes REST API — Node.js · Express · JWT · MongoDB · Mongoose | github.com/kenneth-opara

- Delivered full CRUD for authenticated notes: create, read, update, delete — each note scoped to the owner's user ID.
- Enforced resource ownership via auth middleware; added request validation and structured error responses.

Product Catalog API — Node.js · Express · MongoDB · Redis | github.com/kenneth-opara

- Developed a read-heavy API for product browsing with category filtering and keyword search.
- Applied cache-aside pattern — Redis caches product listings with TTL; cache is invalidated on product updates.

E-Commerce Backend API — Node.js · Express · MongoDB | github.com/kenneth-opara

- Built scalable backend with authentication, product management, order processing, and payment integration.

Real-Time Chat Backend — Node.js · Express · JWT · WebSockets | github.com/kenneth-opara

- Implemented JWT-authenticated real-time messaging backend using WebSockets for bidirectional communication.

PROFESSIONAL EXPERIENCE

Inventory Control & Customer Service Representative · Prince Ebeano & Co., Lagos*Oct 2023 – Apr 2025*

- Improved inventory tracking workflows and procurement coordination, reducing stock discrepancies.
- Analysed operational data to identify trends and inform stock management decisions.
- Collaborated cross-functionally to optimise business operations and streamline customer-facing processes.
- Increased customer satisfaction through structured issue resolution and clear communication.

Storekeeper & Site Supervisor (Contract) · JRB Construction Company, Abuja*Sep 2021 – Feb 2022*

- Maintained accurate inventory and material tracking systems for an active construction site.
- Reduced material waste and loss through improved operational processes and accountability measures.
- Coordinated logistics and workforce scheduling for daily site operations.

EDUCATION & CERTIFICATIONS

B.Sc (Ed) Business Education · University of Nigeria, Nsukka**Scrum Certification** (2023)**Backend Development** TS Academy**ADDITIONAL**

-
- Portfolio: kennethoparadev.netlify.app · All projects available at github.com/kenneth-opara
 - Available for junior backend roles, internships (including remote), and API collaboration projects.
 - Passionate about scalable systems, cloud deployment, backend optimisation, and learning through building.
